

COLOR/ SHAPE OF NODES

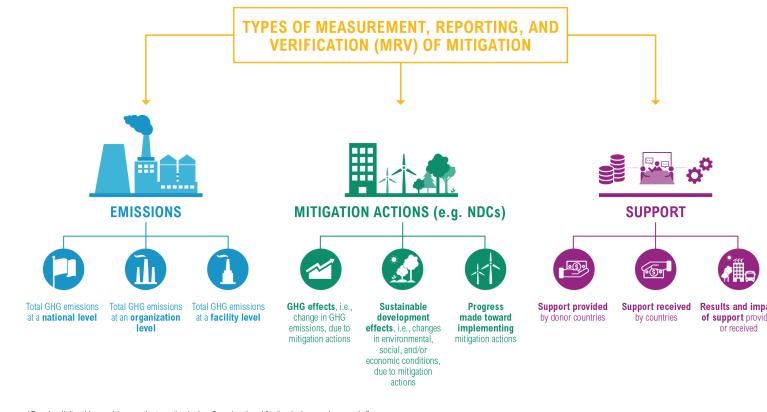

Can I Use that Picture?

The Terms, Laws, and Ethics for Using Copyrighted Images

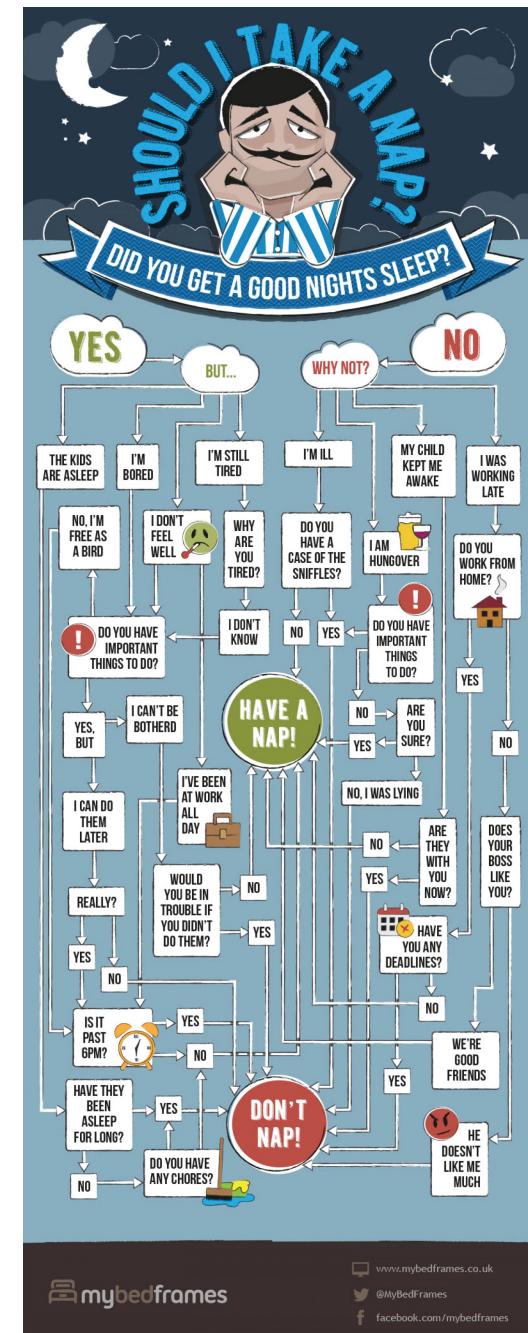

Color has been used to classify different nodes—question nodes are in red, result nodes have white backgrounds with different border and text color to differentiate between doing and not doing an action.

RELATIONSHIP BW NODES

In the above infographic, color has been used to show parent-child relationships vertically, and height (vertical placement) and image size has been used to show different tiers of actions horizontally.

INTERACTION BW NODES

The above nodes interact by virtue of arrows extending from the node to be read before the node the arrow leads into.
